## ATACMS Model - Instructions

**WARNING:** Do not use threadlocker (e.g. Loctite), if adhesives are desired use cyanoacrylate (e.g. Superglue).

- 1) Remove four fins from inside the model, it comes with extras that can be left in the model.
- 2) Assemble the model, by threading the two halves together. Do not overtighten as that can shear the threads.
- 3) Hold each fin perpendicular to the model body and gently insert, while **rotating** 90 degrees, the fins into the body.  
-Fins can be placed any any angle for display
- 4) The model can be displayed vertically (standing on the tail and fins) or on the display stand.  
-Align the model onto the stand so it rests onto the alignment pins.
