## Aero BTA Riser - Installation Instructions

*WARNING: Do not allow threadlocker (e.g. Loctite) to contact the riser, this will void the warranty, as it will weaken the base materials and lead to product failure. If using threadlocker, apply after inserting bolts and avoid all contact with the riser.*

- 1) Remove any existing riser(s) or spacer(s).
- 2) *Optional* - Insert activated Apple AirTag into compartment.
- 3) Orient riser with the rounder section facing forward, and the thinner edge to the rear.
- 4) Torque included mounting bolts to 4Nm (35 in-lbs) with hex driver,  
*DO NOT exceed 5Nm (45 in-lbs).*
- 5) Install cage (or desired accessory) onto riser, by placing two M5 bolts (*not included*) of sufficient length through cage and into riser inserts.
- 6) Ride and enjoy!
- 7) *Removal* - AirTag may be removed by firmly tapping one end of the riser onto a firm surface, until AirTag has moved enough to be removed by hand.
