

Standard BTA Riser - Installation Instructions

WARNING: Do not allow threadlocker (e.g. Loctite) to contact the riser, this will void the warranty, as it will weaken the base materials and lead to product failure. If using threadlocker, apply after inserting bolts and avoid all contact with the riser.

- 1) Remove any existing riser(s) or spacer(s).
- 2) *Optional* - Insert activated Apple AirTag into compartment.
- 3) Install cage (or desired accessory) onto riser, by placing two 5mm bolts (*not included*) of sufficient length through cage and riser body.
- 4) Torque mounting bolts to 4Nm (35 in-lbs) with hex driver,
DO NOT exceed 5Nm (45 in-lbs).
- 5) *Removal* - AirTag may be removed by firmly tapping one end of the riser onto a firm surface, until AirTag has moved enough to be removed by hand.
- 6) Ride and enjoy!
